HackerRank Account

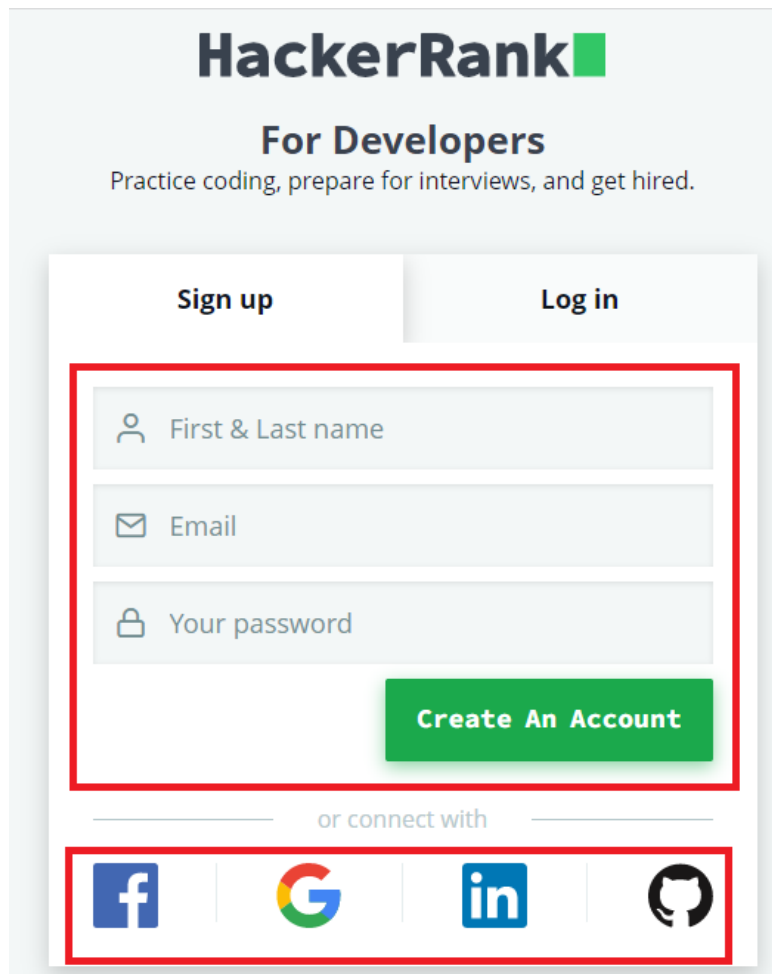

1. Navigate to the website <https://www.hackerrank.com/>
2. If you already have an account you can directly **Sign in**.

3. To create an account under **For Job Seekers** click on **Sign Up & Code**.

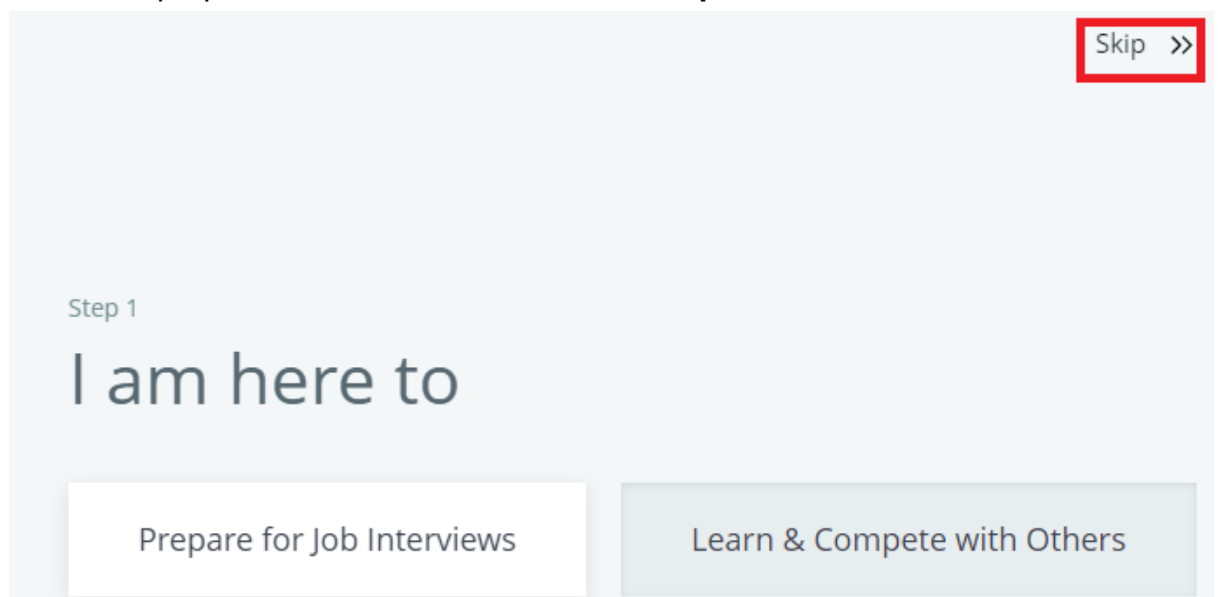

4. Fill in all the details and **Sign Up** or you can directly Sign up with gmail, github, linkedIn or facebook account.

The image shows the HackerRank sign-up page. At the top, the HackerRank logo is displayed with the tagline "For Developers" and the subtitle "Practice coding, prepare for interviews, and get hired." Below this, there are two tabs: "Sign up" (active) and "Log in". The sign-up form is enclosed in a red border and contains three input fields: "First & Last name" (with a person icon), "Email" (with an envelope icon), and "Your password" (with a lock icon). A green "Create An Account" button is positioned below the password field. Below the form, there is a section titled "or connect with" with four social media icons: Facebook, Google, LinkedIn, and GitHub, all of which are also enclosed in a red border.

5. Next steps you will be asked a few personalization questions. You can also **skip** the personalization questions. But answering these questions helps hackerrank to personalize questions for you. If you are just a beginner who wants to learn and practice, select **Learn & Compete with Others**. If you want to prepare for interviews, select **Prepare for Job Interviews**.

The image shows the first step of the personalization process. In the top right corner, there is a "Skip >>" button enclosed in a red border. Below this, the text "Step 1" is displayed. The main heading is "I am here to". At the bottom, there are two buttons: "Prepare for Job Interviews" (highlighted with a white background) and "Learn & Compete with Others" (with a light blue background).

6. Select if you are a student or working professional

Step 2 of 3

I am a

Student Working Professional

7. Select the time you will graduate. If you are interested to get mails about hiring opportunities you can check the box or you can leave the box empty. You can update these later in the settings.

Step 3 of 3

I will graduate in

Select Option

☐ I am interested in being contacted about job opportunities.

ⓘ Your profile and contact information will be shared with recruiters using HackerRank products.

8. When you create an account you will get a verification mail if you didn't get a verification mail you can click the button **Resend Confirmation Email** to get the mail .

 **Confirm your email address.**

Please check your Inbox. We've sent a link to confirm your email address. Once you confirm, you will be able to access all the features of our site, including **Jobs, Leaderboard, Recommendations and more.**

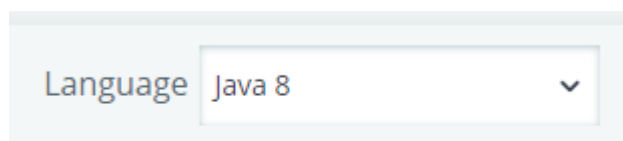

Resend Confirmation Email

Code Editor

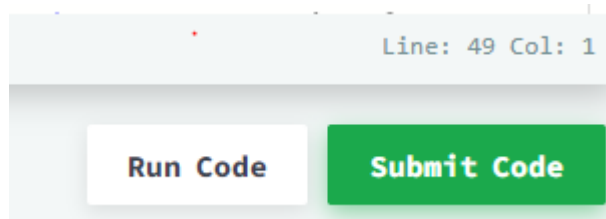

1. Code editor has two tabs, the left side contains problem explanation with sample input and sample output, and the right side is the actual coding area.

The screenshot shows the Code Editor interface. On the left, the 'Problem' tab is active, displaying the problem description for 'Simple Array Sum'. The description states: 'Given an array of integers, find the sum of its elements. For example, if the array $ar = [1, 2, 3]$, $1 + 2 + 3 = 6$, so return 6.' It also includes the 'Function Description', 'Input Format', 'Constraints', 'Output Format', and 'Sample Input'. On the right, the code editor is open, showing a Java 8 solution. The code includes imports for `java.util.stream.*`, `java.util.stream.Collectors.joining`, and `java.util.stream.Collectors.toList`. It defines a `Result` class with a `simpleArraySum` method that takes a `List<Integer> ar` as input and returns an `int`. The code is currently at Line 49, Column 1.

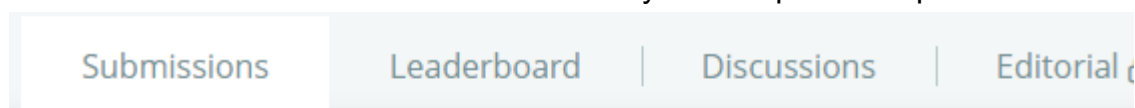

2. You can choose any programming language from the dropdown list.

3. After completing the coding part first **Run Code** to check if the code is properly working and then **Submit Code**.

4. **Submissions** tab contains submission history for that particular problem

You have not made any submissions for Simple Array Sum yet.

Solve Simple Array Sum

5. The **Leaderboard** tab contains ranking for that particular problem.

Problem	Submissions	Leaderboard	Discussions	Editorial
HACKER	RANK	COUNTRY	SCORE	
shashank21j	01		10.00	
sebciok	01		10.00	
Field	01		10.00	

6. **Discussions** tab contains any queries or discussions between users for a problem

Problem	Submissions	Leaderboard	Discussions	Editorial
Sort 2880 Discussions, By: <input type="button" value="votes"/>				
<input type="text" value="Search comments..."/>				
<div> </div> <div></div>				

7. The **Editorial** tab contains solution or hints to solve the problem, but if you unlock it your score for that problem will not be counted.

This editorial requires unlocking.

If you unlock the editorial, your score will not be counted toward your progress.

Yes, I want to unlock

Prepare

Prepare tab contains different options for learning options like-
Certifications- contains coding exams for the same topic you selected and
Candidates who successfully clear the test will be specially highlighted to companies
when they apply to relevant roles.

Certification

Career Fair

The Career Fair tab contains exhibitors which are different companies. The Virtual Career Fair **leverages data from the HackerRank platform to create a skill based experience**. Candidates can use the HackerRank platform to complete contests and certifications before the fair to earn vetted skills.
